CIPI and STOPware Announce Distribution Agreement for PassagePoint

Partnership Delivers Visitor Management Software to Security Dealers Worldwide

Burlington, MA, September 4, 2002 - Comprehensive Identification Products, Inc. (CIPI), a worldwide manufacturer and distributor serving the identification and security industry, today announced its agreement with STOPware Inc., a privately held, California based, software company specializing in visitor badging and lobby security software, to distribute STOPware's flagship product, PassagePoint.

STOPware has pioneered the lobby security software marketplace since 1997. PassagePoint v3 combines the requirements of security, badging, and visitor management. Using PassagePoint, front lobby personnel can quickly produce professional visitor badges while capturing and storing visitor information and photos in an easy-to-use database. PassagePoint meets the security needs of any organization, from those with a single lobby requiring a standalone station, to others that utilize a server-based system with multiple lobbies, many buildings, and widespread geographic locations.

"By partnering with STOPware, our dealers will gain access to the most advanced lobby security software available on the market today," stated Scott Hyde, CIPI's Vice President of Sales and Marketing. "PassagePoint is an affordable and innovative way for an organization to know and manage who is in its building. In addition, PassagePoint is functionally robust and includes top-tier features. Even though PassagePoint is ahead of other products in its class, it is priced at a mid-level and is affordable for small to medium size organizations.

Behind the user-friendly interface, PassagePoint increases security by linking each visitor with a sponsor or host, stamping the time, date and location of entry and exit, recording a full audit trail of each entry, and sending automatic reports via email at the end of the day. In addition, users have full control over badge design and the option to pre-register visitors and groups via a web browser.

"PassagePoint satisfies an important security issue in the market and offers real value to the user," stated Paul Terschuren, CFO of STOPware. "PassagePoint offers more complete solutions for visitor management, badging and tracking and we are pleased with our partnership with CIPI to distribute our software to its wide dealer base."

CIPI, whose global distribution channels include over 2,000 dealers, will be showcasing PassagePoint at the upcoming ASIS show in Philadelphia from September 10 - 13. ASIS (American Society for Industrial Security) focuses on security management, crime and loss prevention, biometrics, identification, and building safety and attracts approximately 13,000 security professionals from the industrial and retail sectors.

About CIPI

Celebrating its 40th anniversary, Comprehensive Identification Products, Inc. (CIPI) is a manufacturer and worldwide value-add distributor of a full line of identification products serving the traditional security and identification industry as well as the advertising specialty (ASI) and promotional products industry. Headquartered in Burlington, MA, USA, the company has business operations in Boston, Hong Kong, and Amsterdam. CIPI owns and operates manufacturing facilities in the U.S. and China specializing in high-volume, light assembly production. Because of its strategic locations, CIPI also specializes in global sourcing. CIPI sells through a network of authorized resellers around the world, supported with comprehensive marketing programs and materials, training, and technical assistance.
