STOPware Announces Web Hosting Service, MyVisitors.net - an Easy-to-Use Service to Extend STOPware's Visitor and Group Pre-Registration Capabilities SAN JOSE, Calif., Jan. 28 /PRNewswire/ -- STOPware inc., leaders in visitor management software, today announced a new web hosting service, MyVisitors.net(TM) to extend pre-registration capabilities of its PassagePoint v4.1 visitor and lobby management software. MyVisitors.net extends STOPware's pre-registration capabilities, which include the Intranet/Internet Module for pre-registration via a Web browser. MyVisitors.net is invaluable for multi-tenant buildings, campuses, gated communities, for customers without a common network, or any organization that wishes to avoid using its own server for pre-registrations. "MyVisitors.net solves the problem of physical limitations of buildings without common networks, and it also eliminates the need for reoccurring maintenance on the system," said Jim Stankevich, STOPware's VP of Business Development. "MyVisitors.net is hosted by STOPware in a secure data center with unmatched security, maximum uptime, as well as the flexibility of the pre-registration feature offered by STOPware's Intranet/Internet Module." How It Works By logging into MyVisitors.net, PassagePoint customers anywhere can pre-register visitors or groups. Within minutes of entry the visitor data is transmitted to the customer's reception area where PassagePoint is being used. Visitor info appears on the day the visitor or group is expected and badges can be printed in advance or upon arrival. PassagePoint visitor management combines the requirements of security, badging and visitor management. PassagePoint captures visitor data with business card scanners, drivers license scanners, signature and photo capture devices, standalone visitor sign-in stations, or keyboard input by lobby personnel. Historical records can be accessed in Rapid Registration, enabling users to print professional visitor badges in just seconds. Availability and Pricing MyVisitors.net is available as a monthly service fee or as a license. Contact STOPware at 408-367-0220 x212 for pricing, the nearest dealer location, or other information. A Guided Tour of PassagePoint is available at www.stopware.com. About STOPware, inc. -Based in San Jose, California, since 1997, STOPware is a privately-held, investor-owned software publisher specializing in visitor management software. STOPware's flagship product, PassagePoint, is a complete lobby security package, spanning needs from basic visitor badging through high-level security. www.stopware.com. PassagePoint(TM) has become the comprehensive standard in visitor management software since its first release in 1997. STOPware is located at 1710 Zanker Road, Suite 202, San Jose, CA 95112, USA; telephone: 408-367-0220; FAX: 408-367-0223. NOTE: PassagePoint, MyVisitors.net, and the STOPware logo are trademarks of STOPware, inc.
