

PassagePoint™ Enterprise v4.5

Powerful Lobby Security Solution for Large Deployments

STOPware introduces PassagePoint Enterprise v4.5, the most comprehensive full-featured visitor management product on the market. This powerful solution lets corporations, government agencies, and other large organizations tailor, deploy, and scale lobby security according to their IT infrastructure, geographic footprint, and database strategy (including the need to integrate with SQL and Oracle).

Greater Functionality, Control, and Security

PassagePoint Enterprise v4.5 includes many features not found in other lobby security products. In addition to all the features found in PassagePoint v4.5 Professional, you get the ability to link to any ODBC or LDAP directory system, as well as Oracle and SQL servers. Plus, PassagePoint v4.5 Enterprise's centralized management that lets you remotely install, configure, and automatically update large deployments in multiple buildings, with multiple servers and workstations.

Improves Security and Corporate Image

- Creates a visible front line of defense for building and staff
- Allows you to screen visitors against historical directories
- Helps stop unwanted visitors through Look-Out/Watch lists
- Lets you quickly produce professional-looking badges

Streamlines Management and Adherence to Process Requirements

- Built-in application server to centrally maintain and update remote locations
- Integrates with access control systems*
- Integrates NDA & Safety Agreements, HIPAA Requirements, and Export Control Requirements

Speeds Registration by 20-25% While Reducing Costs

- Allows sign in of visitors and prints badges with just one click
- Lets employees pre-register visitors to minimize wait time
- Supplements or replaces lobby staff with interactive kiosk
- Eliminates the need for paper forms and storage

* May require add-on license

Greater Speed and Efficiency

Since PassagePoint v4.5 can operate across multiple application servers, verification and registration are very fast up to 30% faster than other systems in comparable environments. This means there are no delays in verifying and registering visitors. And since the system can be configured to support multiple servers, you can efficiently scale PassagePoint Enterprise v4.5 according to your exact needs and specifications.

Special Features and Functionality

- **Redundancy Protection:** PassagePoint Enterprise v4.5 keeps overall lobby security running even when other programs supporting your visitor management solution fail.
- **Federal Security Links:** With links to Homeland Security and other government watch lists, PassagePoint v4.5 provides the ultimate in security protection.
- **One-Year Service Plan:** Each PassagePoint Enterprise license comes with a one-year service plan that includes priority support, updates and new version upgrades.
- **Web Pre-Registration Module (sold separately):** The optional Web Pre-Registration module features a new interface that makes it easy to navigate and use.
- **Support for LDAP:** PassagePoint Enterprise v4.5 includes directory linking capability that supports the latest LDAP protocols. Result: easier data importing and tighter integration with your enterprise environment.
- **SecureView™ Explorer Window:** SecureView is a smaller window located in the lower half of the PassagePoint Enterprise v4.5 Explorer screen that enables staff to visually identify undesirable visitors, view government watch lists, print instant evacuation reports, and review the status of overall building security.
- **Support for Passport Screening:** PassagePoint Enterprise v4.5 Rapid Registration lets you scan passports, as well as driver licenses and business cards.
- **Support for Extended Visits:** With PassagePoint Enterprise v4.5, you can customize registrations for different lengths of visits. For example, registered contractors and other frequent visitors can check themselves in/out over a designated length of time. Or if a partner or client is visiting for just a week, and you want them to be able to check themselves in/out on a daily basis after first registering. Other combinations are possible.
- **Visitor Badge Design Wizard:** PassagePoint Enterprise v4.5 allows the administrator to create custom badges using built-in design wizards and other features such as 2D barcodes and print preview.

PassagePoint Enterprise v4.5's
Web Pre-Registration module
lets employees pre-register visitors

"We know exactly what's going on in our lobby, thanks to PassagePoint... PassagePoint works!"

— Doug Evans, Facilities Manager, Fujitsu Compound Semiconductor
